And today, it's still a powerful resource that can generate clean, renewable, and cheap electricity. They produce energy from running water and convert it to electricity. The power that is produced as a result of falling or running water is called "hydroelectric power" or "hydropower". Turbines and generators convert this power into electricity. Today, about 19% of all our electricity is generated from hydropower, making it one of the largest sources of renewable power. So what makes hydropower renewable? It's simple: water. Water is converted into clouds and recycles back to earth as rain. This process is called "The Water Cycle". The water cycle is continuously recharging and can be used to produce electricity along the way. True/False 36. ۴	متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید. A dictionary is a book which explains the meanings of words and expressions. You can find words easily because dictionaries put them in alphabetical order. The word 'dictionary' comes from the Latin 'dictio' ('saying'). There are several types of dictionaries. Dictionaries which explain words and how they are used; dictionaries which translate words from one language to another; dictionaries of biography which tell about famous people; and technical dictionaries which explain the meanings of technical words. Dictionaries which explain what words mean give a clear 'definition' of them. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose. There are also dictionaries which translate words into other languages. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning. True/False 45. Since dictionaries put words in alphabetical order, you can find them easily. a) True b) False 46. The word 'dictionary' comes from the French 'dictio'. a) True b) False	۱۵
